It is supplementary information and should be read in conjunction with the Company's financial statements and accompanying notes for the three month period ended March 31, 2012, which are prepared on a consolidated basis, and the year ended December 31, 2011.

SEGI is a publicly-traded company listed on the TSX Venture Exchange under the symbol "SQG". Prior to October 31, 2011 the Company's name was Centiva Capital Inc. ("Centiva"). Centiva was listed on the TSX Venture Exchange under the symbol "CVC".

On September 30, 2011, a plan of arrangement (the "Arrangement") was completed pursuant to Section 192 of the Canada Business Corporations Act, whereby Centiva and a wholly-owned subsidiary of Centiva, Ayleen Capital Inc. ("Ayleen") entered into an agreement to distribute the existing assets of Centiva to shareholders by way of the Arrangement. Under the terms of the Arrangement, all of the existing assets and liabilities of Centiva were transferred to Ayleen in exchange for shares of Ayleen and a \$842,832 promissory note. The Arrangement was approved by Centiva shareholders at a special meeting held on September 23, 2011 and by the Superior Court of Justice on September 27, 2011. The effective date of the transfer was October 31, 2011. On the same date Centiva changed its name to Spackman Equities Group Inc. Additional information concerning the Arrangement may be found at "The Arrangement".

Centiva transferred all of its then existing assets and liabilities, other than those relating to the new equity and tax losses, to Ayleen in exchange for common shares of Ayleen. The assets which were transferred to Ayleen from Centiva consisted of cash, an equity interest in a technology-based company, VFM Leonardo Inc., a technology-based business, Grapevine Solutions, and a portfolio of marketable securities.

THE ARRANGEMENT

The following summary of the principal terms of the Arrangement is provided for the benefit of the reader and is qualified in its entirety by reference to the Plan of Arrangement which can be assessed under the Company's profile at www.sedar.com. Shareholders are encouraged to review the Plan of Arrangement in its entirety, as it contains the specific terms and conditions governing the Arrangement.

In late 2010, an opportunity was presented to the Company to raise new equity from a group of investors who are interested in investing in small/medium-sized businesses with growth potential in Asia, principally in China and the Republic of Korea. After due consideration, the Board approved this new strategy and decided to retain Charles Spackman as the new Chief Executive Officer of the Company with a mandate to broaden and refocus the investment scope of the Company to Asia (mainly Korea and China). Prior to the completion of the Arrangement, and conditional upon the completion of the Financing as defined below, the Company entered into agreements for two investments. See "Pre-Arrangement Investments" below.

After negotiations with the group of investors, the Board concluded that the assets of the Company were of limited interest to the investors and that they were not prepared to fully recognize their value. Therefore, it was determined by the Board to spin the existing assets out to Shareholders by way of a Plan of Arrangement and to proceed with the new investment and strategy. The Arrangement was governed by the Arrangement Agreement entered into between the Company and Aylen on June 30, 2011.

Upon completion of the Arrangement, Aylen, which was incorporated as a subsidiary of Centiva, continued to carry on the business which was previously conducted by the Company up to October 31, 2011 and the business of the Company since October 31, 2011 has been to (i) identify and acquire small/medium-sized growth companies, primarily in the PRC and the Republic of Korea, that possess proprietary technologies and a track record of profitable operations; (ii) assist the management of each acquired company to enhance its value; (iii) originate collaboration amongst the portfolio of acquired companies to create new opportunities for one another and leverage off each others' capabilities and resources; and (iv) reflect the collective value derived from the performance of the acquired businesses on the share price of the Company.

The Corporation created a wholly-owned subsidiary, Aylen, for the purposes of the Arrangement. As part of the Arrangement, all of the existing assets and liabilities of the Company, other than the tax losses, were transferred to Aylen in exchange for shares of Aylen and a promissory note in an amount of \$842,832 which represented \$0.05 per each issued and outstanding common share of the Company immediately prior to the Arrangement and the completion of the Financing. The promissory note is repayable (in full or in part) by Aylen upon disposition of the assets transferred to it by Centiva and is secured against the assets of Aylen's Grapevine Solutions division. The stated capital of the Company's Common Shares has been reduced by an amount equal to the fair market value of the Company's assets less its liabilities on the date such assets and liabilities are transferred to Aylen. The Company has distributed on a pro-rata basis, to each Shareholder, all the shares of Aylen. Certificates for such shares have been withheld pending the attaining of "reporting issuer" status by Aylen.

INVESTMENTS

Prior to the completion of the Arrangement, the Company acquired 1,791,667 common voting shares of Intech representing 17.916% of Intech's issued and outstanding common shares. Intech, incorporated in Hong Kong, engages in the research & development, manufacturing and sales of various types of LCD panels and modules, together with after-sales maintenance services.

The Company also acquired 100 common shares, or 100%, of Spackman Equities from DVG Limited. Spackman Equities is a special purpose vehicle incorporated in Hong Kong to hold:

Prior to October 31, 2011 the revenues of the Company were derived mainly from the operations of Grapevine. Revenue for the current quarter include the revenues from the Opus and Zip businesses which have been consolidated with the revenues of the Company from January 10, 2012 when the Company indirectly acquired majority equity ownerships in those businesses, to March 31, 2012 being the end of the quarter. CRITICAL ACCOUNTING ESTIMATES

The Company's accounting policies are described in Note 2 to the 2011 financial statements. The preparation of the Company's financial statements in conformity with International Financial reporting Standards requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the current quarter. Changes in estimates of useful lives are accounted for prospectively from the date of change. Actual results could differ from these estimates.

The assets and liabilities that require management to make significant estimates and thus are deemed critical accounting policies are the carrying value of its privately-held investments and the fair value of option grants.

Investments

Investments in shares of investee companies in which the Company's ownership is greater than 20% but not more than 50%, and over which the Company has the ability to exercise significant influence, are accounted for using the equity method. At March 31, 2012, December 31, 2011 and December 31, 2010, the Company had no such investments.

For other investments, in accordance with IFRS 7, IAS32 and IAS39, the Company carries the investments consistent with the following:

Publicly-traded investments, if any held, over which the Company does not have the ability to exercise significant influence are classified as available for sale and are carried at fair value based on quoted closing prices at the balance sheet date or the closing price on the last day the security traded if there were no trades at the balance sheet date; and

Privately-held investments are classified as available-for-sale and are valued at cost except where there is pervasive evidence supporting an increase or decrease in carrying value.

These fair values of the Company's investments are subject to risks and uncertainties.

RISK FACTORS AND RISK MANAGEMENT

SEGI shareholders and potential investors in SEGI should carefully consider the following risk factors and all the other information contained in this MD&A when evaluating SEGI and its common shares.

An investment in SEGI's shares involves a number of risks, many of which are beyond its control. The risks and uncertainties set out below are all of the known risks which are deemed to be material to the Company's business or the results of its operations. When reviewing forward-looking statements and other information contained in this prospectus, investors and others should carefully consider these factors, as well as other uncertainties, potential events and industry-specific factors that may adversely affect the Company's future results. If any of these risks should actually occur, the Company's business, financial condition, results of operations, cash flows and prospects could be harmed. Such risks and uncertainties are not the only ones the Company faces. Additional risks and uncertainties of which the Company is currently unaware or that are deemed immaterial may also adversely affect the Company's business, financial condition, results of operations, cash flows and prospects.

Limited Cash and Working Capital and Negative Cash Flows

Historically, the Company has had negative cash flow from operating activities and has had to fund its operations with cash on hand and cash equivalents. The Company's cash on hand and cash equivalents at March 31, 2012 was \$1,168,000, which should be adequate to continue to fund the Company's operations for at least the next 12 months. Subsequently, on May 25, 2012, the Company completed a private placement of 39,545,451 common shares of the Company to a group of arms-length investors at a price of \$0.11 per share for gross proceeds of \$4,350,000. This additional amount should be adequate to continue to fund the Company's operations and investment activities for the foreseeable future. Beyond that, the Company may have to sell assets such as its investments, or raise funds through the sale of additional equity or a combination of those two things, in order to fund its operations. There may not be a ready market for the sale of its assets and it may not be possible to issue additional shares or other securities, or the issue of additional shares or other securities if it were to be possible may result in significant dilution to the interests of existing shareholders.

Intech, Opus and Zip may continue to require additional funding to continue operations or to develop their business plans. The Company's negative cash flow and limited cash and working capital restrict the Company's ability to invest significant additional funds in its investee companies in the event they should need additional funding.

Limited Diversification of Investments

Due to the small size of the Company and the fact that it has only a limited number of investments, the Company is subject to a greater risk of a downturn in one or more of its investments. A concentration of the Company's invested funds in the Opus, Zip and Intech businesses means that in the event that any such business or industry or investment is unsuccessful or experiences a downturn, this will likely have a material adverse effect on the Company's business, results from operations, and financial condition. It also means that the Company is more exposed to business cycles than it would be if it owned a larger number of investments which were diversified over various industries with differing business cycles in different geographic areas.

Dependency on Private Company Operations

The Company owns a 17.9% equity interest in Intech which is a private company. Due its minority equity investment, the Company does not have any significant influence over Intech or its operations nor does the Company have the ability to exercise control over Intech.

Industry Risks

Each of the Company's investee companies is subject to the risks inherent in the industry in which it operates. In the case of Intech, the business is very dependant on the continued demand for LCD screens, particularly in China. In the case of Opus and Zip, their businesses are very dependant on the strength of the Korean film industry and their ability to continue to finance and make successful, profitable movies. Illegal piracy of films and illicit internet downloads of films are also risks which will continue to threaten the Korean film industry.

Competition

Intech, Opus and Zip face intense competition in their respective markets, including competition from other companies some of whom have greater financial and other resources, and more advanced technological development. In the case of Opus and Zip, the movie industry is a word-wide industry and films made in Hollywood, India and many other countries compete with Korean films on the worldwide stage for viewership. There can be no assurance that they will be able to successfully compete against their respective competitors or that such competition will not have a material adverse effect on their businesses, financial condition, results of operations and cash flows.

Currency Fluctuations

The Company is exposed to fluctuations in the value of the currencies of the Republic of Korea, the People's Republic of China, the Special Administrative Region of Hong Kong, Canada and the United States.

The Company does not use currency derivatives to hedge against adverse currency fluctuations.

Legal Claims and Other Contingencies

SEGI, and its investee companies may become parties to law suits, claims and litigation arising in the ordinary course of business. Such law suits could result in significant costs and the outcome of such law suits could have a material negative impact on the Company's financial position, operating results, or the Company's ability to continue to carry on its business activities.

Lack of Market for SEGI's Shares

Although the Company's common shares are listed and traded on the TSX Venture Exchange, there may not be a liquid market for the shares and any market price for the shares may not reflect the underlying value of the Company's business and assets.
